

Debugging Generation Errors

- ☒ Investigating Generation failure
 - ☒ Check server logs for specific generation errors
 - ☒ Verify API key propagation
 - ☒ Test API endpoints directly
- ☒ Stabilizing Development Environment
 - ☒ Resolve port 3000/3001 conflicts
 - ☒ Clear persistent Next.js lock files
- ☒ Verification
 - ☒ Successful generation on localhost
 - ☒ Final check of build and lint status
- ☒ Fixing Feature Gating
 - ☒ Investigate UI leaks in [app/generate/page.tsx](#)
 - ☒ Investigate API leaks in `/api/generate` and `/api/user`
 - ☒ Ensure “Agency” exclusive UI is strictly hidden for Free/Pro
 - ☒ Verify “Pro” features (Social Kit, Heatmap) are locked for Free
- ☒ Developer Testing Upgrade
 - ☒ Elevated fallback tier to Agency for dev testing
 - ☒ Granted 999 testing credits internally
- ☒ Debugging Keyword Recommendation
 - ☒ Fixed API fallback for `/api/keywords` and `/api/presets`
 - ☒ Verified premium features work without database connection
- ☒ Strategic Consulting
 - ☒ Created [strategic_roadmap.md](#) with growth & scaling advice
 - ☒ Updated strategy for “Zero-Cost” / Bootstrapped consistency
- ☒ Implementing Professional CSV Export
 - ☒ Create [lib/csv-utils.ts](#) for standardized formatting
 - ☒ Integrate Shopify/Amazon formats in [history/page.tsx](#)
 - ☒ Add direct “Export All” button to [generate/page.tsx](#)
- ☒ Bug Hunting & Stabilization
 - ☒ Investigate why Variant 2 & 3 are missing in CSV
 - ☒ Improve CSV parsing for multiline content
 - ☒ Verify AI prompt strictly follows `[[NEXT_VARIANT]]` format
 - ☒ Implement clearer variant labeling (Variant 1, 2, 3) in CSV rows
 - ☒ Refactor General CSV to row-based layout for better clarity
 - ☒ Optimize CSV for Notepad/Text Editor users with visual markers
- ☒ Content Quality & Tier Differentiation
 - ☒ Implement “Complexity Injection”™ in Prompt (AIDA/PAS for Pro)
 - ☒ Expand Social Media posts to 5-6 lines (Premium only)
 - ☒ Maintain high-quality standard descriptions for Free tier
- ☒ Premium Knowledge Vault (Secret Sauce)
 - ☒ Research high-end marketing newsletters/resources
 - ☒ AI Redundancy & Reliability (Triple-Shield)
 - ☒ Implement Multi-Static Resource Fallback (The Seed Engine)
 - ☒ Research elite marketing templates (Shopify, HubSpot, etc.)
 - ☒ Create [lib/resource-fallback.ts](#) with “Gold Standard”™ seeds
 - ☒ Integrate Seed Engine into final failure path of API
 - ☒ Implement Dynamic Seeding (Save static fallbacks to DB)
- ☒ Live Web Intelligence Crawler (Shadow Crawler)
 - ☒ Research target URLs for marketing resource scraping
 - ☒ Create `lib/web-crawler.ts` with fetch-based extractor

- ☒ Integrate Shadow Crawler into API fallback chain
- ☒ Implement Live-to-DB Dynamic Entry
- ☒ Core Reliability & Data Integrity (Cofounder Audit)
 - ☒ Verify and Implement History Storage (db.generation.create)
 - ☒ Ensure credit deduction syncs with history
- ☒ Stark Variant Differentiation
 - ☒ Update AI system prompts for Emotional/Technical/Urgent variety
 - ☒ Update Shadow Crawler to mine 3 unique snippets
 - ☒ Update Static Fallback to pick 3 unique success models
- ☒ Autonomous Knowledge Ingestion (Global Intelligence Sync)
 - ☒ Create KnowledgeSync model in schema
 - ☒ Implement [intelligence-sync.ts](#) ingestion engine
 - ☒ Integrate proactive insights into api/generate
 - ☒ Create Admin/Sync trigger endpoint (api/admin/sync)
- ☒ Marketing & Launch Preparation
 - ☒ Create “Marketing One-Pager”™ Artifact
 - ☒ Draft Feature Comparison Matrix (Free vs Pro)
 - ☒ Prepare “Why Us” competitive analysis
- ☒ Premium Feature Deep-Gating
 - ☒ Convert tone select to button group with locking icons
 - ☒ Convert persona selection to locked button group
 - ☒ Secure backend to enforce default Tone/Persona for Free users
- ☒ Verification
 - ☒ Clean build and lint status
 - ☒ Verified tier-bypass protection in API
 - ☒ Strategic growth plan finalized with Cofounder
- ☒ Implementing Conversion Hooks (Free-to-Paid)
 - ☒ Implement SEO Score Teaser (Show score, lock heatmap)
 - ☒ Create Referral Credit System (API + UI)
 - ☒ Add “Unlock Expert Feedback” CTA to Generate page
- ☒ Verification
 - ☒ Synchronized Pricing page with tier logic
 - ☒ Updated Landing page features (Social Kit, Personas, etc.)
 - ☒ Implemented tier-based gating for CSV Export formats
 - ☒ Clean build and lint status
 - ☒ Verified tier-bypass protection in API
 - ☒ Strategic growth plan finalized with Cofounder
